

We're all about safety! From the services we provide to the products we recommend and the team that supports them, our mission is to protect workers and their workplace environments.

Our business was founded in 1946, and we have steadily expanded our geographic reach, product and service offerings, and knowledge pool. Today we operate from our U.S. and Canadian headquarters in Columbus, Ohio, and Brantford, Ontario, respectively, in support of our clients across North America.

We have access to safety products that are designed and manufactured in North America, Europe, South America, and Asia. We think and source globally and act and deliver locally. We are intimately involved with regulatory changes and pronouncements, new equipment innovations, and the constant development of our team's knowledge and skills in the business of safety.

Our management team and associates promise to serve our customers with excellence, to be a resource for their safety needs, and to help provide workplace environments that are injury free every day.

We hope that you find our team's knowledge, eagerness to serve, and passion for safety clearly evident in all we do.

Safety Today is a proud and active member of the following safety organizations:

© Safety Today, Inc., 2007

While you're managing the business, who's helping take care of your workplace and workers' safety?

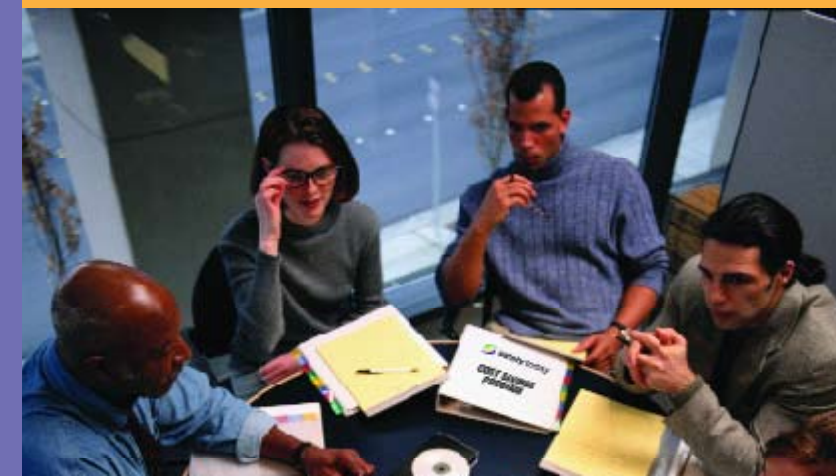

We make safety a priority and work closely with our customers to achieve improvements in compliance, worker productivity, and workplace injury reduction. We can augment internal resources as well as provide solutions and safety knowledge at the time and place of need. A focus on and belief in safety as an integral part of your business strategy has proven results in operational performance and profitability.

Safety Today is here to help. We are full-service safety experts, a safety distributor ... PLUS.

We are safety knowledge providers, safety trainers, and safety problem solvers who have been partnering with companies like yours to reduce potential risk, injuries, and liability for over 60 years.

All cost-reduction program results are documented—by location—and presented quarterly.

Knowledge, Experience, Expertise, Solutions

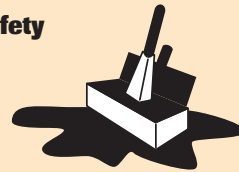

Our field safety specialists throughout North America provide on-site technical support, full safety audits, and employee training programs on proper fit and use of safety products. We help plant operations and facilities apply cost-reduction and risk-reduction solutions in the following areas:

Fall Protection

- Comprehensive fall-protection program
- Fall-protection equipment inspection services
- Consultation and evaluation of areas of risk to complete training and technical support
- Recommend cost-effective fall-protection solutions that will provide your associates the greatest safety and peace of mind

Facility/Environmental Safety

- Preventive programs for safe handling of flammable materials and dangerous chemicals
- Hazardous-spill prevention and control strategies
- Minimizing risk from slippery work surfaces
- Traffic safety, poor visibility, and more

Respiratory Protection

- Air quality sampling and monitoring
- Fit testing and proper use training
- Your turnkey solution: A complete supplied air solution

Arc Flash Analysis

- NFPA 70E education programs
- Electrical hazards analysis and prevention
- Ongoing support and regulatory compliance

Confined Space Entry

- Evaluate your current confined-space protection
- Recommend evacuation and ventilator systems to reduce risk
- Ensure accident-prevention plans are current and comply with industry and regulatory standards

Instrumentation

- Service center for portable instrumentation and respiratory equipment
- Warranty, repair, overhaul, flow testing, and recalibration services
- Preventive maintenance programs
- Rentals

Signage, Identification, and Marking

- Lockout, tagout, and facility safety signage
- Identification system and employee education
- Facility signage/identification surveys

Training & Education

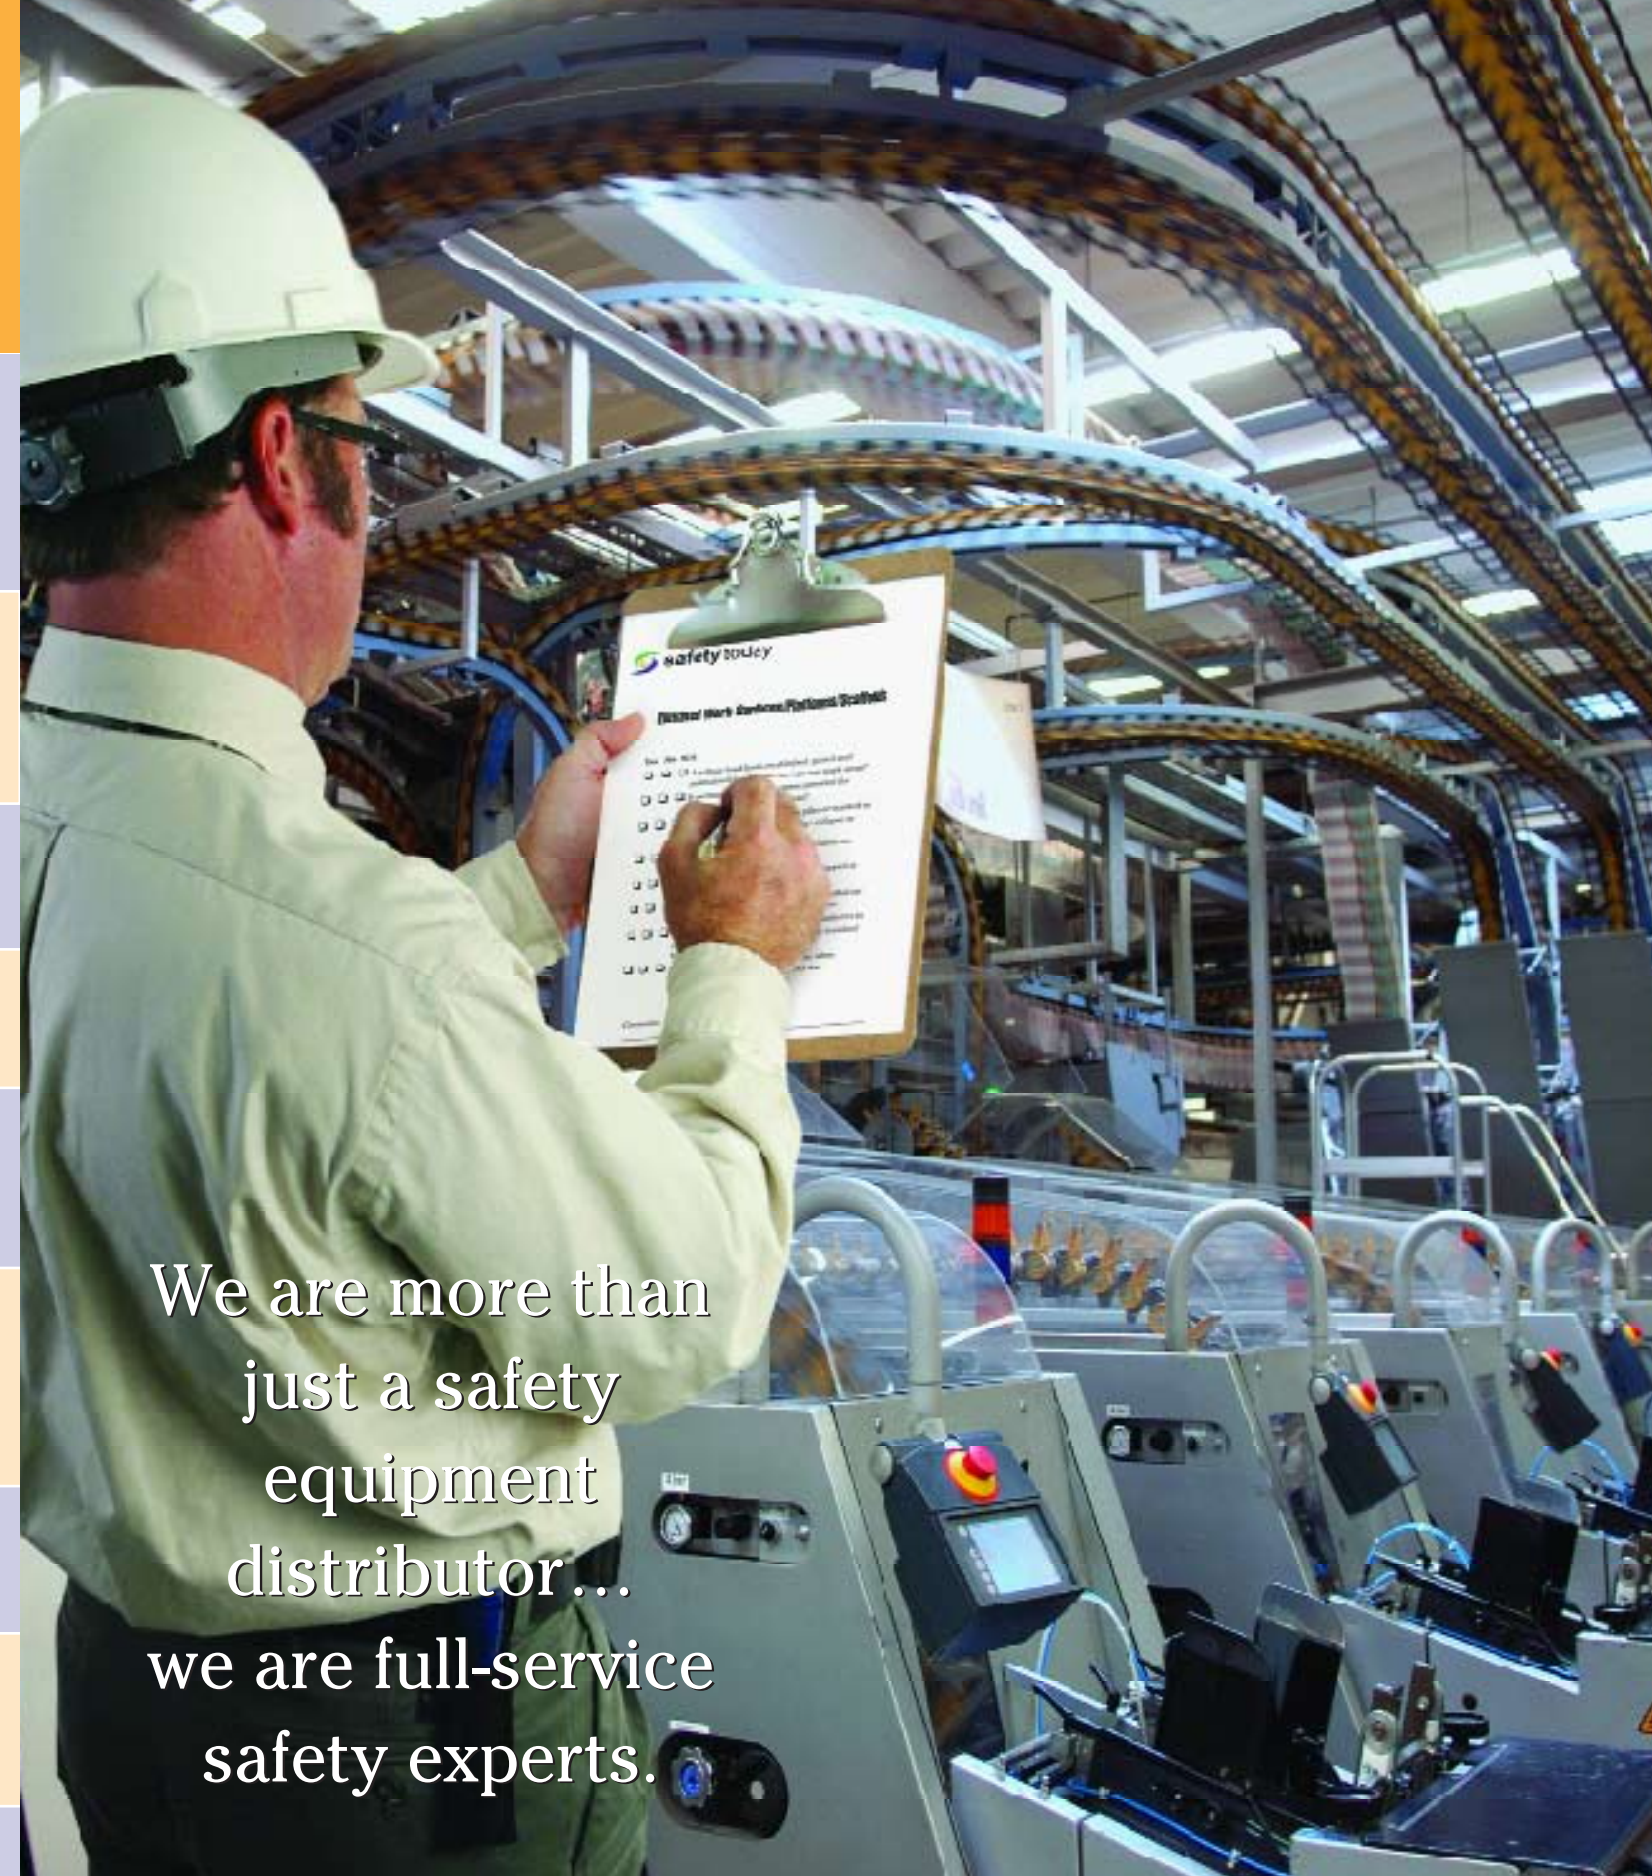

- Develop and Conduct site and exposure/risk specific programs
- OSHA, CSA, DOT, EPA and NFPA regulatory compliance
- Lockout/tagout, electrical safety/arc flash, confined space, fall protection

Personal Protective Equipment

- Standardization programs—we represent 98% of the manufacturers
- A complete safety audit of your plant
- Safety equipment cost-savings reports and management
- Complete on-line catalog. View, click, buy...
